

Optimize Your Energy Mix *With Solar*

Tap the power of the sun as a smart part
of your energy strategy

HOW **SOLAR** WORKS

CAPTURE THE SUN

Experts install solar panels suitable for your roof or your land — and you start tapping the power of the sun for onsite electricity.

A SEAMLESS SWITCH

Keep the same utility — while solar power reduces your utility consumption.

EMPOWER YOUR BUSINESS

Your utility delivers any energy necessary beyond your solar generation. Leverage IGS Energy or your current supplier to source it — and sell any extra energy back for a credit on your bill.

Discover *solar* as a long-term energy strategy

Thanks to innovation, falling costs, and incentives, **it's simpler than ever.**

In today's volatile market, pairing grid electricity with solar is now one of the best ways to **protect your budget**. And data shows that businesses who do **gain priority** with both customers and partners.

IGS Energy specializes in customizing a proactive path to **reduce consumption, optimize your energy mix, and leverage solar** as part of a long-term, holistic strategy.

Why *Solar* Just Makes Sense

About Us

We are an experienced development partner and help make going solar easier and faster using our streamlined process. We've developed over 125 solar projects totaling \$250 million nationwide, and we're here to help you every step of the way.

Is Solar Right for My Business?

Here's what we consider.

- ✓ Suitable roof (min. 20,000 sq. ft. and less than 5 years old) or land location (1+ acre)
- ✓ Long-term ownership plans for property (20+ years)
- ✓ Financial and credit profile approval

Let's figure it out together with a simple conversation.
