

# Gain More Efficiency with IGS Lighting Solutions.®

Learn how modern LED technology makes it easy to reduce usage *and* expenses.

UP TO  
**100%**  
LONGER LASTING  
than legacy  
technology

UP TO  
**75%**  
LESS ENERGY USE  
than legacy  
technology

## *Lighting* Has a Bigger Impact on Your Budget Than You Think

Through IGS Lighting Solutions, we offer a turnkey program that upgrades your buildings with modern, affordable LED systems with minimal impact to your operations.

Our customized systems use up to **75% less electricity** and last up to **100% longer than legacy technology**. Best of all, we can often complete an upgrade in weeks that could take your staff years, allowing you to start seeing the ROI, performance, and safety benefits right now.

### Where LED Technology Makes the Biggest Impact:

- Industrial Facilities
- Offices
- Warehouses
- Retail Settings
- Schools
- Showrooms
- Campuses
- Event Venues

## THE BENEFITS OF MODERN TECHNOLOGY

### Move the Needle

Lighting is often one of the easiest and most affordable ways to make efficiency gains.

### Ideal Light Levels & Color

Ensure people, products, and environments look their best, while improving safety and productivity.

### The Right Light

Light everywhere you need it, and nowhere you don't, for ideal levels and efficiency.

### Flexibility & Control

Tailored, intelligent systems give you more control in specific areas to easily adjust as needed.

### Improve Efficiency

Help reach efficiency goals, including fulfilling your facility's LEED specifications.

### Rebate Management

Experts manage this detailed process with your utility to get every dollar you deserve.

## Short Pay-Back. *Long-Term Value.*

On average, advanced LED technology pays for itself in less than 3 years while **lasting up to 15 years.**

**But a warranty is only as good as the manufacturer backing it.**

That's why we partner with established manufacturers that offer warranties as long as 10 years on a variety of products. As a trusted partner, IGS Energy will be here long term — supporting wherever and whenever you need it.

# Upgrading Should *Be Easy*

Our experts help every step of the way from site analysis and system design, through installation and long-term manufacturer warranty support. We'll even help you claim market-specific rebates from your utility to make sure **you get every dollar you deserve.**

1

## 1. EXPERTS RUN THE NUMBERS

Our specialists start with a site audit of your buildings to estimate the ideal system for your needs, then confirm we're optimizing your expected ROI, payback time, and performance gains.

2

## 2. DESIGN FOR LONG-TERM PERFORMANCE

Whether it's a new installation or retrofit, our engineers design from scratch, sourcing the ideal components for your solution from trusted vendors. Our goal: the highest value, greatest efficiency, and ideal light for your spaces.

3

## 3. SEAMLESS INSTALLATION, ILLUMINATING RESULTS

We optimize installation to minimize disruption — even if it's third shift. That means a faster, easier upgrade while you run your business. After you flip the switch, we stay within reach, answering questions, and helping manage warranties long term.

## Own Your System with *Flexible* Financing

Depending on your resources or preferences, you can pay for your system up front or choose available in-house financing to eliminate capital outlay.

Most importantly, **you own your system** from day one.

## Project Snapshot

Replex, a midsize plastics manufacturer, needed a lighting upgrade to meet multiple objectives — we guided them through the process.

GOALS	RESULTS
Cut electricity and maintenance costs	Reduced lighting energy use by <b>62%</b>
Reach new sustainability targets	Annual carbon footprint cut by <b>56.5 metric tons</b>
Comply with industry standards	Achieved standards set by Illuminating Engineering Society
Meet tight deadline for utility rebate eligibility	Expedited installation to ensure deadline compliance
